SUMMARY

AI Product Analyst with production experience at a B2C AI startup, owning **product discovery, PRDs, roadmap prioritization, user stories, and acceptance criteria** across **3 LLM workflows** and **24 production agents**. Shipped AI products spanning **RAG, multi-agent systems, multimodal AI, and LLM evaluation**, achieving **90% production accuracy** and **92% LLM cost reduction**. Strong in **data-driven decision-making, customer problem solving, and engineering collaboration**.

EXPERIENCE

Kookar AI | LOR **08 2025 – 05 2026**
AI Product Analyst Intern *Gurugram, India*

- Owned **product discovery and roadmap prioritization** for the **Preferences & Memory** pod across **3 LLM workflows** and **24 production agents**. Authored **PRDs, user stories, and acceptance criteria**; translated customer feedback into actionable requirements for engineering.
- Designed and shipped a **multi-agent memory system** spanning **6 memory types**, continuously capturing food, grocery, persona, and operational preferences from onboarding calls and WhatsApp chats across text, audio, images, and links.
- Designed and optimized a **Customer Approval Agent** across **4 customer workflows** meal-plan approval, grocery-cart approval, order placement, and wallet recharge nudges leveraging engagement patterns to drive a **2× increase in approval and order-completion rates** and reduce approval time by **67%**.
- Drove early-stage customer activation by managing the onboarding journey for **15+ households**, contributing to **10+ D7-to-D14 retention conversions**.
- Diagnosed customer-reported issues using **LangSmith analytics**; managed triage, prioritization, and engineering hand-offs via **Linear**. Drove **RCA + SOP refinement** loops that lifted production accuracy to **90%**.
- Led a **cost-optimization initiative**, forming cost-quality hypotheses and running data-driven evaluations to migrate 24 agents to lightweight LLMs, delivering **92% LLM cost reduction at 90% retained accuracy**.

PROJECTS

GEO Auditor | *Python, FastAPI, BeautifulSoup4, httpx, NLP Heuristics* **08 2026 – Present**

- Built an automated **Generative Engine Optimization audit API** evaluating website AI-readiness across **4 deterministic checks** using targeted crawling, HTML/JSON-LD parsing, and NLP heuristics.
- Developed a weighted **0–100 AI-readiness score** with evidence-backed findings and **prioritized remediation plans** to help website owners improve AI discoverability.

Multimodal AI Agent | *Python, FastAPI, Groq Whisper, PyMuPDF, Tesseract, Pydantic, Docker* **07 2026 – 08 2026**

- Built a **multimodal AI workflow** processing PDFs, images, and audio through a custom **Clarifier–Planner–Executor–Composer** agent architecture with validation and retry logic.
- Designed a **3-panel product UI** displaying extracted content, generated answers, and execution-plan traces; deployed live.

AskMyDocs: Chat-with-PDF RAG App | *Python, RAG, FAISS, BM25, Cross-encoder, RAGAS, LangSmith* **05 2026 – 06 2026**

- Built a **user-facing PDF Q&A product** with hybrid retrieval (BM25 + dense + RRF), cross-encoder reranking, agentic 8B-router + Gemini 2.5 Flash, token streaming, and cited page references; achieved **1.00 context recall, 0.67 faithfulness, and 83% page-hit** on a 10-Q golden set; deployed live.

Font Recognition Using CNNs | *Python, Deep Learning, CNN, LeNet* **01 2025 – 05 2025**

- Built a CNN-based font recognition system using LeNet; reduced overfitting by **20%** and achieved **93.3% font-style classification**, **0.03px MAE** on font-size regression, and **95% combined accuracy**.

TECHNICAL SKILLS

AI / LLM / GenAI : LLMs, GenAI, RAG, Agents, Multimodal AI, Prompt Engineering, LLM Evaluation, LangGraph, LangChain, RAGAS, LangSmith, LLM Observability, Workflow Automation, n8n, Model Context Protocol (MCP)
Product & Agile : PRDs, Product Discovery, User Stories, Acceptance Criteria, Roadmap Prioritization, Customer Feedback Analysis, Hypothesis-Driven Evaluation, A/B Iteration, Data-Driven Decision Making, Stakeholder Communication, Agent Workflow Design
ML / DL : Machine Learning, Deep Learning, CNNs, Artificial Intelligence
Methodology / Tools : Agile / Scrum, RCA, SOP Authoring, Success-Metrics Tracking, Notion, Linear, Python, Git

EDUCATION

IIIT Sricity **08 2022 – 06 2026**
B.Tech in Computer Science & Engineering | ***CGPA: 8.13 / 10*** *Sri City, Andhra Pradesh, India*

ACHIEVEMENTS

- Scored **87%** in TCS NQT February 2025 (National Qualifier Test)
- Ranked **Top 10** out of **300 teams** in Thrive Digital National Healthcare Hackathon 2023
